International journal of medical microbiology impact factor

Skip to contentImpact Factor3.473CiteScore6.1View articlesSubmit your paperHomeJournalsInternational Journal of Medical MicrobiologyISSN: 1438-4221Editor-in-ChiefEditorial boardProfessor Sebastian Suerbaum, MDAnnouncement: From January 2020International Journal of Medical Microbiology is an open access journal. Authors who publish in International Journal of Medical Microbiology will be able to make their work immediately, permanently, and freely accessible. International Journal of Medical Microbiology authors will pay an article publishing charge (APC), have a choice of license options, and retain copyright to their published work.International Journal of Medical Microbiology continues with the same aims and scope, editorial team, submission system and rigorous peer review.Pathogen genome sequencing projects have provided a wealth of data that need to be set in context to pathogenicity and the outcome of infections. In addition, the interplay between a pathogen and its host cell has become increasingly important to understand and interfere with diseases caused by microbial pathogens. IJMM meets these needs by focussing on genome and proteome analyses, studies dealing with the molecular mechanisms of pathogenicity and the evolution of pathogenic agents, the interactions between pathogens and host cells ("cellular microbiology"), and molecular epidemiology. To help the reader keeping up with the rapidly evolving new findings in the field of medical microbiology, IJMM publishes original articles, case studies and topical, state-of-the-art mini-reviews in a well balanced fashion. All articles are strictly peer-reviewed. Important topics are reinforced by 2 special issues per year dedicated to a particular theme. Finally, at irregular intervals, current opinions on recent or future developments in medical microbiology are presented in an editorial section.Submit your paperThe Impact Factor of this journal is 3.473, ranking it 69 out of 137 in MicrobiologyWith this journal indexed in 17 international databases, your published article can be read and cited by researchers worldwideView articlesView historical data and other metrics on Journal InsightsJournalFinder uses smart search technology and field-of-research specific vocabularies to match your manuscript to Elsevier journals.Simply insert your title and abstract and select the appropriate field-of-research for the best results.Fill in details You may also be interested in the following journals Search About Journals, Conferences, and Book Series Last Updated on November 16, 2021 Note: The impact score shown here is equivalent to the average number of times documents published in a journal/conference in the past two years have been cited in the current year (i.e., Cites / Doc. (2 years)). It is based on Scopus data and can be a little higher or different compared to the impact factor (IF) produced by Journal Citation Report. Please refer to the Web of Science data source to check the exact journal impact factor [™] (Thomson Reuters) metric. Important Metrics Title International Journal of Medical Microbiology Abbreviation Int. J. Med. Microbiol. Publication Type Journal Subject Area, Categories, Scope Infectious Diseases (Q1); Medicine (miscellaneous) (Q1); Microbiology (Q1); Microbiology (medical) (Q1) h-index 94 Overall Rank/Ranking 2784 Scimago Journal Rank (SJR) 1.325 Impact Score 3.40 Publisher Urban und Fischer Verlag GmbH und Co. KG Country Germany ISSN 14384221, 16180607 International Journal of Medical Microbiology is a journal covering the technologies/fields/categories related to Infectious Diseases (Q1); Medicine (miscellaneous) (Q1); Microbiology (Q1); Microbiology (medical) (Q1). It is published by Urban und Fischer Verlag GmbH und Co. KG. The overall rank of International Journal of Medical Microbiology is 2784. According to SCImago Journal Rank (SJR), this journal is ranked 1.325. SCImago Journal Rank is an indicator, which measures the scientific influence of journals. It considers the number of citations received by a journal and the importance of the journals from where these citations come. SJR acts as an alternative to the Journal Impact Factor (or an average number of citations received in last 2 years). This journal has an h-index of 94. The best quartile for this journal is Q1. The ISSN of International Journal of Medical Microbiology journal is 14384221, 16180607. An International Standard Serial Number (ISSN) is a unique code of 8 digits. It is used for the recognition of journals, newspapers, periodicals, and magazines in all kind of forms, be it print-media or electronic. International Journal of Medical Microbiology is cited by a total of 894 articles during the last 3 years (Preceding 2020). The impact score (IS) 2020 of International Journal of Medical Microbiology is 3.40, which is computed in 2021 as per its definition. International Journal of Medical Microbiology IS is increased by a factor of 0.32 and approximate percentage change is 10.39% when compared to preceding year 2019, which shows a rising trend. The impact score (IS), also denoted as Journal impact score (JIS), of an academic journal is a measure of the yearly average number of citations to recent articles published in that journal. It is based on Scopus data. IS 2020 of International Journal of Medical Microbiology is 3.40. If the same upward trend persists, impact score of joule may rise in 2021 as well. Year Impact Score (IS) 2021/2022 Coming Soon 2020 3.40 2019 3.08 2018 3.27 2017 3.49 2016 3.66 2015 4.26 2014 3.84 International Journal of Medical Microbiology has an h-index of 94. It means 94 articles of this journal have more than 94 number of citations. The h-index is a way of measuring the productivity and citation impact of the publications. The h-index is defined as the maximum value of h such that the given journal/author has published h papers that have each been cited at least h number of times. The ISSN of International Journal of Medical Microbiology is 14384221, 16180607. ISSN stands for International Standard Serial Number. An ISSN is a unique code of 8 digits. It is used for the recognition of journals, newspapers, periodicals, and magazines in all kind of forms, be it print-media or electronic. The overall rank of International Journal of Medical Microbiology is 2784. According to SCImago Journal Rank (SJR), this journal is ranked 1.325. SCImago Journal Rank is an indicator, which measures the scientific influence of journals. It considers the number of citations received by a journal and the importance of the journals from where these citations come. International Journal of Medical Microbiology is published by Urban und Fischer Verlag GmbH und Co. KG. It's publishing house is located in Germany. Coverage history of this journal is as following: 2000-2020. The organization or individual who handles the printing and distribution of printed or digital publications is known as Publisher. Visit the official website of the journal/conference to check the further details about the call for papers. The ISO 4 standard abbreviation of International Journal of Medical Microbiology is Int. J. Med. Microbiol.. This abbreviation ('Int. J. Med. Microbiol.') is well recommended and approved for the purpose of indexing, abstraction, referencing and citing goals. It meets all the essential criteria of ISO 4 standard. ISO 4 (International Organization for Standardization 4) is an international standard that defines a uniform and consistent system for abbreviating serial publication titles and journals. If your research field is/are related to Infectious Diseases (Q1); Medicine (miscellaneous) (Q1); Microbiology (Q1); Microbiology (medical) (Q1), then please visit the official website of this journal. The acceptance rate/percentage of any academic journal/conference depends upon many parameters. Some of the critical parameters are listed below. The demand or interest of researchers/scientists in publishing in a specific Journal/Conference, Peer review complexity and timeline. The mix of unsolicited and invited submissions. The time it takes from manuscript submission to final publication. And Many More. It is essential to understand that the acceptance rate/rejection rate of papers varies among journals. Some Journals considers all the manuscripts submissions as a basis of acceptance rate computation. On the other hand, few consider the only manuscripts sent for peer review or few even not bother about the accurate maintenance of total submissions. Hence, it can provide a rough estimation only. The best way to find out the acceptance rate is to reach out to the associated editor or to check the official website of the Journal/Conference.
